Discovery Learning Center Philosophy

We believe that children learn best through the process of discovery! The active learning, or "hands-on" approach, is developmentally appropriate for all children regardless of their age. Staff implement the High/Scope curriculum at Discovery Learning Center.

Daily activities are planned in areas of:

- Social Development
- Language and Literacy
- Creative Representation
- Music
- Movement
- Logic
- Mathematics

A parent is the most important teacher in a child's life.

Each classroom is equipped with age appropriate materials that stimulate

the children's interests and natural desire to discover!

Parents are welcome and encouraged to visit and/or volunteer whenever possible ... to take the opportunity to see our policies in action and reassure themselves that their child is happy in a safe and caring environment.

Our staff interacts constantly with the children in their care: teaching, encouraging, and nurturing their natural curiosity.
